INTRODUCTION

Savita Global Exchange was established on August 2020 as a Global based cryptocurrency trading and digital platform the first of its kind. Following the popular surge of digital currencies, holders & traders of cryptocurrencies recognized the need for a secure, transparent, and modern digital exchange through which they can trade their assets with ease, lesser fee, prompt liquidity & trusted marketing advisers. Savita coin was built with the idea to create a global e-commerce marketplace, a gaming technology and a fee token for the parent companies. In order to keep the ideal digital currency goal alive there must be a significant role in which the digital asset will play in the economy to enable a large community usage, the three (3) brands mentioned above is the ideal roadmap which Savita coin is set to be used for market penetration in the global wide world.

Savita is her community (all of us!). This project was born out of a spirit of community, to help new users and professionals to navigate the exploration of the crypto world and have fun at the same time! A true community led project is transparent, open to suggestion, considerate of criticism, and ready to meet the needs and exceed the expectations of those it serves. We hope that after looking at our road map and engaging with our community that you will join us on this journey.

DEFINITION OF DIGITAL CURRENCY/ASSETS?

Digital cryptocurrency is a form of money that is accepted internationally does not depend on governments and central banks to cross borders. Hence, these currencies are decentralized. Currently, more people adopt this new form of money as its value is preserved, and can be an alternative to gold and to the most traditional way of fiat currencies.

If you are new to cryptocurrency, it is worth mentioning that the revolution has come a long way. While we think that the crypto trade is at its peak, we are probably mistaken since the crypto market is everblooming with new and innovative digital coins and tokens.

The virtual currencies are being introduced into the global digital market at an unprecedented rate. There is a rising interest in the digital currencies, making the trading arena to be incredibly dynamic.

SAVITA COIN

Within any project that considers the construction of an ecosystem based on Blockchain, including the development of an own token, there is a need to support, among other aspects, the value of the token, to study the factors that influence its initial value, growth, how to obtain said tokens, and fluctuation of their value over time.

When an idea of a Blockchain project for the development of a token arises, it must be understood that although this topic is something innovative, it still depends on concepts belonging to the economy, such as supply and demand, in addition to defining a structure of operation of said token or native currency and with this construct the ideas on a solid and transparent bases that generate confidence in the project.

Savita Coin (Token) is pegged to Savita Exchange as a means for Savita users to pay internal transfer & trading fees, this will enable our users to experience lower charges of fees and excessive fees which is part of the driven motive of this project, the token will also

serve as a Valuable asset to its holders as the value Increases over time, our motive for Savita Coin is to Encourage lower income earners to participate in the crypto space this will give our community a future to hope and depend on.

Savita coin Is built on BEP20 (Binance Smartchain) Standard, a specific set of functions must be incorporated into a smart contract that, at a high level, will allow the following actions:

1. Get the total supply of tokens.
2. Get the balance of an account.
3. Transfer token.
4. Approve that the token can be spent.

A reason we chose the Popular BEP20 for standard is due to the less fees Binance Smartchain Users enjoy during Transactions.

Liquidity: Enough Liquidity for Trade

Community: Large Community 25,000+

Market Circulating Supply:

Total Supply: 500,000,000

ABSTRACT

Savita coin will be used to support pure-crypto/e-commerce community building, infrastructural development (supporting local production of consumption goods), high fee reduction (paying less fee on trades, shopping of goods & taxes), community interaction (engaging user-user trade with trust), economic growth (local trading of goods and services), Savita gives (charity & hospitality), gaming (a true world of game interest almost 3 billion gamers worldwide).

Savita Global Exchange is a digital asset trading platform with strong focus on user-user experience, cryptocurrencies academy, social trading and e-commerce service & video Game Technology. Savita coin was created to reduce high tension on excessive crypto trading fee, increase customers satisfaction, shop worldwide with a common payment option on e-commerce platforms, trading Functionality and advanced security. The platform is designed for both seasoned and entry-level investors, enabling everyone accesses to the lucrative digital assets market with reduced risk. For stat-up traders, Savita academy offers an A-z guide on how to place trade, cancel trade, guidelines on valuable cryptocurrencies & customer 247 support.

Savita Exchange offers you the following:

Cryptocurrency Trading, Online store/shopping, video game technology.

Shop Online with your favorite crypto, and get it delivered in Few Minutes through P-2-P Method Operandum.

Transfer and exchange digital assets to fiat currencies and traditional assets.
Crypto Education.

MOTIVATION OF THE PROJECT

The Global Exploration of Digital assets is on the rising and more than 3 billion people in the global world wide web will consider crypto currency as a means of payment in the next decade, driving the fiat currency 70% out of the way, Savita's Motivation comes from the Opportunity to advance the crypto marketplace in such a way it will be available to the common man in the rural societies to operate.

Another motivation which led to the establishment of Savita is the economic development of Most Asian & African nations, Most Asian & African Region has faced so much un-development and poverty in the last 100 years after many civil wars which has claimed the lives of millions of civilians and mostly children from those regions. Savita will be using part of its resources to establish infrastructural development and fund the technical educational system of the said regions; this we have mapped out plans on how to build the infrastructures to accommodate indigenes and non-indigenes of those regions to provide adequate standard of living and opportunities for investors to establish more jobs for the locals.

Savita have a clear understanding of her responsibilities, as some of us are sensitive to the people's sufferings. The people have sought for help for half a decade, yet no listening ears has been given to them, the goal of Savita is to establish infrastructure in the Asian & African regions to reduce the poverty rate and create a sane environment for locals.

Another motivation to establish Savita is the idea to reach out to individuals from the global world wide web to use our platform to trade their favorite crypto currency at their comfort with less fee, excessive fees from the global and big exchanges are driving a lot of people away from the crypto market, so we have come to redesign the industry and bring a more comfortable trading fee ranging from 0.01%, this will give our global users more satisfaction to get the value of their assets whenever they are turning it to fiat currency or stable coins.

TOKEN PROPOSED SOLUTION

The stability and growth of the Savita Coin will be in tune with the value of the main cryptocurrencies, Bitcoin, Ethereum, Ripple and BNB, among others. Certainly, the transparency and confidence of the project have a positive impact on the value of the token, but we cannot leave aside the environment where Savita Coin will coexist with other cryptocurrencies.

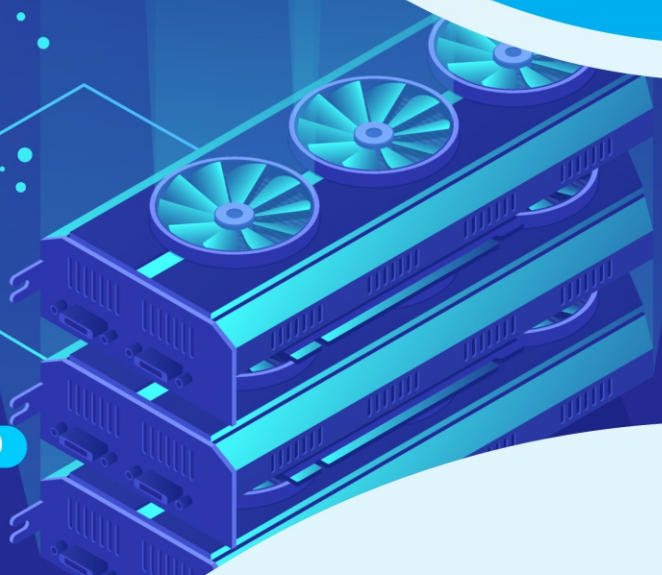

In recent months, the behavior of the main cryptocurrencies has been stable, with the highest value being that of Bitcoin in its exchange rate with respect to the US dollar. This stability means that the market is growing and tokenization projects such as ours are receptive to citizens and this makes the value of our token stable and growing as it is known and accepted by new users.

Our proposal seeks to present alternatives to users of Savita Exchange to purchase and pay fees with the token and users who will engage on the Savita E-market to purchase their favorite products with the Savita Coin & Users who will be involved on the gaming platform to use the Savita Coin to bet and earn money for their various games, and we believe that the Savita token will gain the trust of its users. We believe also that the people will feel an important part in the evolution of the gaming & E-commerce platforms. .

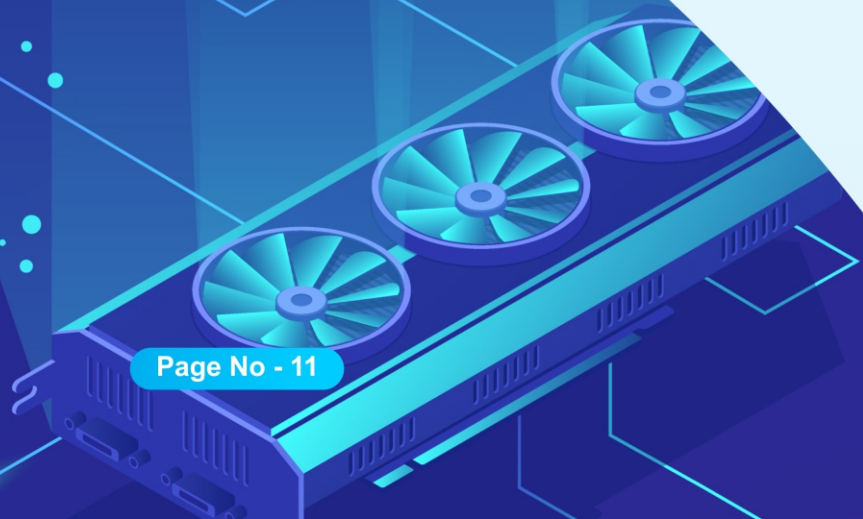

MONETARY POLICY/TOKEN POLICY

In order to combat the depreciation of value that will happen with the yearly decreasing discount, Savita coin plans to burn 2% of its total supply annually starting from 2024, 100 million tokens will be burned in a decade. The final goal of “The Burn” is to stabilize the price of Savita coin over time.

TOKEN PRICE MODEING AND PROJECTION OF PLATFORM USERS

First, we focused on the study of the growth of platform users. We can do this through an analysis of population growth based on classical studies of differential equations, where we can apply the logistic function to predict this growth.

APPLICATION SOLUTION

Millions of people worldwide would be able to meet their financial needs and obligations. For example, the ability for the unemployed to raise more capitals for investments in business opportunities, hence the rate of unemployment will be reduced, individualities can fluently raise finance for social engagement and, students can easily fund their education programs and meet other financial demanding situations or financial obligations.

FUTURE VISION / LONG-TERM SOLUTION

The Entire world is actively waiting for innovations to make work and activities easier; Savita will partner with major innovative industries to provide this innovation to the world, this industry includes:

1. The auto mobile industry,
2. The Auto Mechanical workmen/women
3. The Local Production factories in Africa, Europe, America and Asia.
4. The Global Oil Exploration Industry
5. The Construction Industry
6. The Waste Management Industry
7. Educational System of the World etc.

E-COMMERCE

Online shopping is one of the most popular and adaptive means of shopping in the world and our global E-COMMERCE payment solution is to give entrepreneurs and Merchants a means to pay for their goods & services with the Savita token in a fastest way possible without the need for Foreign Exchange. Savita is adopting the e-commerce to spread the use of cryptocurrency to curb payment difficulty in buying and selling of products across the world.

It is our belief that, if the shoppers can make payment easier worldwide, they will buy more and more nation's economy will increase overtime. This can result in more scaling and success for small businesses and assist them to raise the chance to survive the highly competitive e-commerce world.

Savita Exchange users will benefit from excellent branding, marketing and customer support. Our experts will assist the entrepreneurs in gaining and broadening marketing and sales experience in order to compete more favorably against and more established brand.

RECENT GROWTH OF E-COMMERCE.

Market Size & Growth.

As the world economy continues to grow, even more the e-commerce industry, the last couple of years have already proven this. Over a given period, the YOY has seen a steady increase. Despite a challenging year for retail in 2020, it is estimated that the worldwide retail e-commerce sale grew 27.6% for the year; for a retail of 4.28 trillion US dollars and e-retail revenues are projected to grow to 5.4 trillion US dollars in 2022. In 2024, Statista estimates a total market share of 6.3 trillion US dollars which has a 47% increase in just 2 years time.

This impressive growth in turnover is complemented by an equally impressive increase in the number of customers shopping on e-commerce stores. The number of e-commerce shoppers increases annually at the rate of about 16% in 2017, over 1.6 billion people shopped online.

Market Share:

In 2020, e-retail sales accounted for 18% of all the retail sales worldwide.

This figure is expected to reach 21.8% in 2024.

Countries that grow faster than the world average (effective May 2021) in rising order, are, China, Brazil, India, South Africa, Indonesia, Argentina and Turkey.
